

OnTimeParts.com Tutorial: Searching for Parts

There are several ways that you can search for parts using OnTimeParts.com. You can search for parts by:

- Entering a full or partial part number of at least three characters in the 'Search' text box.
- Entering a key word in the 'Search' text box.
- Using the part categories in the "Browse Parts" sidebar to drill down to a specific group of parts.

To search by entering a full or partial part number or keyword:

- In the "Search" box in the upper right hand corner of the page, enter a key work or a full or partial part number. The more specific your search, the more refined your results will be.

*Please note that you will need to enter a minimum of three characters to return any search results. If you enter less than three characters, you will receive a notification that reads, "No items were found matching your search criteria."

- After you enter the characters that you wish to search for, click on the magnifying glass icon or press Enter on your keyboard.
- Your results will appear for you to browse. Search results are sorted in numerical order by part number.

Intelligrated invested a great deal of time and money in categorizing our parts and developing this feature for our web users. We encourage all of our users to browse these categories for familiarization. If you feel you have found a part that is improperly categorized, please contact ontimepartssupport@intelligrated.com.

- Select the appropriate category from the list that you feel would be most representative of that part that for which you are searching. The example shows, “Electrical & Electronic Components”.
- You will find that these categories begin at the most general level and get more specific as you continue to drill-down through additional subcategories. .
